Launching Gantry Crane

Bridge Building Crane

Bridge building crane is a crane suitable for highway and railway bridges. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Bridge building crane is composed of the main beam, the upper end beam, the outriggers, the lower end beam, the lifting trolley, the hydraulic system and the electrical device.

[Bridge building crane](#) can be applied to beams of equal span or different spans. There are two brackets at the rear. It saves the lateral space during driving and enables it to pass through the tunnel together with the beam transportation vehicle.

Advantages Of Bridge Building Crane

- The structure of the product is light and wind resistance is good.
- Save labor and improve work efficiency.

Parameters Of Bridge Building Crane

Lifting weight	50~200t
Span	20~50m
Lifting height	30~50m
Working class	A6~A7
Power supply	380v 3p or customized

Packing Of Bridge Building Crane

- Parts and electrical components are packed in plywood boxes to avoid damage caused by falling and the impact of the goods during transportation.
- The girder and other main parts will be packed with a plastic woven cloth to prevent rust during transportation.
