Hoist & Crane Trolley

Chain Hoist

The Electric [chain hoist](#) can be operated in different lifting speeds because of the modular design of its motor and reducer. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Advantages of Chain Hoist

- Advanced performance structure, convenient to lift with light weight
- Easy to handle, reliable performance, wide using scope, heavies, load and unload
- It also can be installed on I-beam, cantilever crane and fixed point to lift heavies

Specification of Chain Hoist

| | |
|------------------------------|---|
| Model | Electric Chain Hoist |
| Lifting capacity | 0.1t ~5t |
| Lifting height | 3-8m |
| Power | 0.9-4.8Kw |
| Warranty | 1 Year |
| Running speed | 10m/min |
| Certification | CE ISO GOST |
| Work duty | M5 |
| After-sales service provided | Video technical support |
| Machinery test report | Provided |
| After warranty service | Video technical support, Online support |
| Package type | Packaged by High-quality wooden case |

Application Of Chain Hoist

This electric chain hoist is mainly used to lift light and small size materials or goods in the processing and assembly line of general manufacturing, packing and painting. The electric chain hoist can not only for fixed suspension use but also can be used with an electric monorail trolley and hand push/pull monorail trolley.
