Port & Container Crane

Container Gantry Crane

Container gantry crane is a typical heavy-duty gantry crane, which is widely used for loading and unloading, lifting and transporting containers on ships in ports and docks.

The [container gantry crane](#) is mainly composed of a cart traveling mechanism, electrical devices, container lifting tools, crane beams and so on. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Compared with some small light weight gantry cranes, Container gantry cranes are generally larger and powerful, with higher operating speed and working level, and are highly dependent on ships and environmental conditions.

Parameters Of Container Gantry Crane

Lifting weight	5~50t
Span	18~35m
Lifting height	20m
Working-class	A5/A6/A7
