## Gantry Crane

### Double Girder Gantry Crane

[Double Girder Gantry Cranes](#) are usually assembled with electric hoists or winches or trolleys. As common lifting equipment, they are divided into three types: light, medium, and heavy cranes. The lifting weight is 5 to 500 tons, and the span is 18 to 50 meters. As a professional [crane manufacturer](#), we can also customize it for you according to the needs of customers.

### Advantages of Double Girder Gantry Crane

- Reasonable structure
- Superior performance
- Smooth operation
- Low working noise, large operating cabin space and good vision
- Convenient maintenance, parts can be replaced
- Save energy and reduce energy consumption

## Specifications of Double Girder Gantry Crane

Capacity	Ton	5~300
Span	m	12~35
Lifting height	m	6~12
Lifting speed	m/min	2~15
Traveling speed	m/min	20~60
Drive type	Motor-driven for all motions	
Duty class	A3~A6	
Power source	380V, 50HZ, 3 phase (or other standards)	
Working temperature	-20~40°C	
Control model	Pendant pushbutton control or remote control or cabin control
