

Henan Tosta Machinery Co., Ltd.

Hoist & Crane Trolley

Insulation Electric Hoist

The [insulated electric hoist](#) is characterized by good insulation performance, which is mainly used for smelting workshops of electrolytic aluminium, magnesium, lead, zinc, copper and other non-ferrous metals. Its insulation system is installed in the drive and lifting mechanism of the trolley to ensure the resistance value of each point is not less than 1.01.0M Ω at room temperature.

The materials used for this kind of hoist should be of high strength and have good wear resistance. Its structure including a lifting mechanism, traveling mechanism, insulation system, electric control system, etc. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Advantages of Insulation Electric Hoist

- Simple operation and cost-effective
- Various specifications and models with various lifting and running speeds
- Versatile parts and convenient maintenance
- Simple structure and small limit size

Specification of Insulation Electric Hoist

Model	Hoist Units
Capacity	1t ~ 32t
Lift speed	3 ~ 8m/min
Travel speed	20m/min
Work duty	M4
Warranty	1 Year
Machinery test report	Provided
After-sales service provided	Online support
After warranty service	Video technical support, Online support
Packaging details	Electric wire rope hoist is packaged by High-quality wooden case

Application Of Insulation Electric Hoist

The Insulated Electric Hoist is characterized by good insulation performance, which is mainly used for smelting workshops of electrolytic aluminium, magnesium, lead, zinc, copper and other non-ferrous metals.
