Light Crane

Jib Crane

Jib cranes are light and convenient cranes that we have been designing to rotate at multiple angles. It can rotate 180°, 270°, 345°, 360°. Its simple structure, convenient installation, flexible rotation and enlarged working space are light crane equipment suitable for modern production.

The jib crane is composed of a column/pillar, a slewing device, a boom and an electric hoist, etc. The swingarm can be rotated according to the user's requirements. The rotating part can be operated manually or electrically.

[Jib cranes](#) are used in production lines, assembly lines, warehouses, ports, laboratories, etc. in machinery manufacturing, automobiles, shipbuilding and other modern industries. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Advantages Of Jib Crane

- Simple structure, simple and convenient operation
- Large working space, energy-saving, and high efficiency
- Flexible 360°rotation, suitable for docks, warehouses, assembly workshops, and other places

Parameters Of Jib Crane

| | |
|------------------|--------------|
| Lifting capacity | 0.25~0.5t |
| Lifting height | 4m |
| Working-class | A3 |
| Power supply | 380v-50Hz-3p |

Packing Of Jib Crane

- The electrical parts and electric hoists are packed in high-quality wooden boxes to avoid deformation during the process.
- The product boom and other parts are packed with a plastic woven cloth to avoid bumps during transportation.
