Light Crane

Lifting Platform

The lifting platform is a vertical lift, which is used indoors and outdoors. It is a widely used aerial work equipment.

The [lifting platform](#) is an ideal choice to ensure work safety and improve safety. The engine can be a general electric motor, explosion-proof electric motor and electrical appliances, and it can work normally when it is stopped.

Our lifting platform has high stability, large platform and high carrying capacity, allowing multiple people to use it at the same time, and making aerial operations more efficient and safer

Lifting platforms are mainly used in factories, airports, offices, shops, stations, building decoration and other industries. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Advantages Of Lifting Platform

- Sturdy structure, few failures, easy maintenance, and high safety.
- Improve work efficiency.
- Emergency stop button for lifting platform to reduce accidents.

Packing Of Lifting Platform

Parts are packed in high-quality wooden cases to avoid product deformation during transportation.
