Port & Container Crane

Port Container Crane

The [port container crane](#) is a heavy-duty double-beam gantry crane with a U-shaped door frame and a very large leg distance, up to 7M. It is suitable for loading and unloading containers, heavy and large cargo.

The port container crane is composed of four main parts: bridge structure, trolley traveling mechanism, crane traveling mechanism and electrical equipment.

Port container cranes are widely used in railway freight yards, ports, storage yards, container freight stations and other places. Zhonggong [cranes factory](#) can provide you various cranes with satisfied service.

Advantages Of Port Container Crane

- Advanced technology, exquisite design, beautiful appearance
- Novel structure, large span, high stability, strong reliability
- Large loading capacity, high work efficiency, flexible operation, and simple maintenance

Parameters Of Port Container Crane

Lifting weight	5~500t
Span	18~35m
Lifting height	45m
Working-class	A5/A6/A7
Power supply	3 Phase 380V 50hz

Packing Of Port Container Crane

- Electrical components are packed in high-quality plywood crates to reduce deformation during transportation.
- The main beam, end beam, and trolley are packed with plastic woven cloth. It can reduce wear during transportation.
