Hoist & Crane Trolley

Wire Rope Electric Hoist

CD1, MD1 Wire Rope Electric Hoist is lifting equipment of small size, which can be installed on the single beam crane, overhead crane, gantry crane or jib crane. It can be also used as a winch. Zhonggong [cranes factory](http://www.zggrouppcrane.com) can provide you various cranes with satisfied service.

Advantages of Wire Rope Electric Hoist

- Adjustable mechanical structure, high sensitivity
- Preventing hook clashing the top, sensitive reaction
- Safe and durable, easy to install and debug

Specification of Wire Rope Electric Hoist

Model	Monorail Hoist
Lifting weight	1t~20t
Lifting height	6m~36m
Voltage	380V Other voltage please consult our customer service.
Warranty	1 Year
Lift motor power	4.0/0.6kw
After-sales service provided	Field installation, commissioning, and training
Machinery test report	Provided
Control method	Pendant +Remote(Customized)
Package type	Electric wire rope hoist is packaged by High-quality wooden case

Application Of Wire Rope Electric Hoist

The [wire rope electric hoist](#) is essential equipment used in warehouses, mines, factories, harbors, workstations and general manufacturing. Model CD1 has only one normal speed for general application.

Model MD1 provides two working speeds: Normal speed and low speed. Low speed is used for precise loading and unloading, stacking, machine tools maintenance, etc. So, Model MD1 is more widely used than Model CD1.
